

POLAR CRANE CONTROL SYSTEMS

SOLUTIONS:
Plant I&C Systems

For control of polar cranes and reactor building cranes, with a typical 320-ton capacity Diakont's polar and bridge crane control systems utilize advanced security, management, and diagnostic features built on the most rugged modern industrial automation components. Modular construction allows for expedited installation time.

Features:

- Compliance with current international regulations
- Single-failure-proof lifting systems
- Systems based on proven, long life cycle Siemens components
- Integrated network of protections and interlocks, designed using Diakont's probabilistic safety analysis system
- Automated integral diagnostic systems
- Open system, providing an opportunity to modernize and expand with future plant I&C system changes
